Stitching The Future Of **Surgical Innovation**

Harsha Ahmed, Alice Jiang, Abbie Chu, Michelle Kim, Grace Wu, Anika Thakur

Embedding Strategy in the A&A Credo

Patients

Expands access through balanced, affordable pricing

Employees

Builds long-term capability through a committed workforce

Community

Supports healthier communities through access, care, and education

Stockholders

Delivers sustainable value through scalable growth and returns

The Market Opportunity

The Problem

- Shift from non-barbed to barbed sutures
- Increasing competition and substitutes
- Need to retain and expand market leadership

Objectives

- Expand wound closure portfolio
- Accelerate adoption of barbed sutures
- Drive profitable, long-term growth in an emerging market

Win today's market while leading the shift to next-generation wound closure

Our Executive Summary

Our Recommendations

- Symmetrical → Purchase IP
- Spiral → Internal Development
- Pricing → Medium
- Marketing → Gold
- Supply Chain → New Plant
- Human Capital → Full-Time

Market Share
~86–87%

NPV
~\$22.7M

10-Yr Rev:
~\$116.7M

We enter quickly, build differentiated innovation, and scale with the capacity and support needed to capture long-term market growth.

The Current Wound Closure Market Landscape

Traditional Sutures Transition	Barbed Suture Benefits	Robotic Surgery Growth
○ Transition from traditional sutures is accelerating ○ Hospitals prioritizing faster closure	○ Knotless design reduces procedure time ○ Lower infection risk and improved outcomes	○ Increased precision surgery demand ○ Rapid adoption of Talos robotic surgery post-FDA approval

for Talos
Robotic
Surgery

WEAKNESSES

WEAKNESSES

Zero barbed
suture
products
today

No barbed
suture
IP or first-mover
advantage

Cornelia plant at
full capacity

Late entrant vs.
Crius and Athena

OPPORTUNITIES

OPPORTUNITIES

No spiral suture on market — first-mover window open

Robotic surgery driving rapid barbed adoption

Growing global wound closure market

Expand \$27.4B MedTech segment revenue

THREATS

THREATS

Crius: FDA-approved barbed suture already in market

Athena: owns the foundational symmetrical suture patent

Surgical staples & adhesives as substitutes

Regulatory Hurdles

Out Positioning Key Competitors

	Aegis & Aegis	Crius	Athena
Key Product	Non-barbed suture	Poseidon (barbed)	Kronos (Symmetrical Barbed)
Strength	Global Scale, Surgeon Relationships	FDA-Approved Barbed Product	Symmetrical Suture Patent
Technology Position	Spiral Opportunity	Dual-angle Design	Bidirectional Design
Market Position	Current Leader (non-barbed)	Early Barbed Entrant	Innovation Focused
Strategic Advantage	No Barbed Portfolio Yet	Less Differentiated	Smaller Scale
Strategic Weakness	Late Entry Risk	Share Capture	Patent Barrier

The Decisions Drivers

Structural Shift

Barbed Sutures
Are Redefining
Surgical Standard

Future = Spiral

Spiral
Technology
Drives Long-
Term Market
Leadership

Adoption Barrier

Pricing &
Education Limit
Early Adoption

Control = Value

Ownership Drives
Margin & Scale
Advantages

The Research & Development Strategy

Rationale	Tradeoff
• Accelerates entry into existing market • Secures ownership of next-generation technology • Aligns short-term execution with long-term	• Higher upfront capital and R&D intensity • Slower realization of spiral-driven monetary returns • Reduced flexibility vs. fully outsourced approach

Outcome:

Captures immediate share while establishing long-term category leadership

Symmetrical
Sutures
Purchase IP

Spiral Sutures
Internally Develop

The Pricing Strategy

Medium Pricing

Rationale	Tradeoff
• Maximizes access to majority of market • Balances volume growth with strong margins • Supports early-stage adoption curve	• Lower per-unit margin vs. premium pricing • Foregone short-term profit upside • Limits immediate premium positioning

Outcome:

Drives rapid adoption while maintaining strong, scalable profitability

The Marketing Strategy

Rationale	Tradeoff
• Accelerates surgeon trust and adoption • Establishes A&A as the name in barbed sutures first • Sales reps build durable hospital relationships	• Higher up-front fees • Relationship-driven returns take time to materialize • Requires coordinated global deployment of medical sales reps

Gold Tier

Outcome:

Builds clinical credibility and surgeon relationships Bronze/Silver cannot deliver for a novel suture platform

The Supply Chain Strategy

New Plant Construction

Rationale	Tradeoff
• Ensures full quality control and IP protection • Built from scratch for barbed sutures • Supports scalable long-term capacity	• Highest CapEx • Full construction and commissioning risk on a 6-year timeline • Existing revenue must carry business through entire build period

Outcome:

Long-term platform capability development to lead barbed suture market

The Human Capital Strategy

Rationale	Tradeoff
• Full-time employee knowledge compounds over time • Precision FDA-regulated manufacturing demands consistent, committed staff • Reflects A&A's Credo responsibility	• Higher fixed cost base • Less flexibility to scale down • Longer time-to-competency than plug-and-play contractors
Outcome: Protects proprietary manufacturing knowledge and strengthens Credo alignment	

Full-Time Employees

Generating Strong Financial Performance

Linking Decisions to Value Creation

Category	Decision	Value
Speed + Innovation	Fast entry with Symmetrical sutures and long-term differentiation with Spiral technology	Establishes Aegis & Aegis (A&A) as a leader in the next generation of wound closure while capturing immediate market share.
Strong Adoption	Utilizing Gold tier marketing and Medium pricing.	Gold marketing drives real usage through surgeon education, while medium pricing increases accessibility, maximizing access to the majority of the market.
Scalable Growth	Investing in a new plant and a full-time workforce.	The new plant supports future demand, and a full-time workforce builds long-term capability and stability for sustained excellence.
Financial Soundness	Balancing risk versus return to ensure consistent performance.	Results in a strong Net Present Value (NPV) of approximately \$22.7M and an average revenue of \$10.6M.

First-mover strategy

Winning Through a Cohesive Strategy

Speed & Innovation

- Fast entry with symmetrical
- Leadership and differentiation with spiral

Strong Adoption

- Gold marketing drives real usage
- Medium pricing increases accessibility

Scalable Growth

- New plant supports future demand
- Full-time builds long-term capability

Financially Sound

- Strong NPV with consistent performance
- Balanced risk vs return

Executing a Phased Path to Scale

Positioning A&A to Lead the Future of Surgery
